

March 1, 2013

Dr. Brusovanik was named the Physician of the Month at Palmetto Medical Center.

"It has been a real challenge starting a Minimally Invasive Spine Surgery program at Palmetto Medical Center. I help patients with neck pain that radiates to the shoulders and arms and back pain that is felt down the thighs and legs. However, to perform these intricate surgeries safely, I rely on a large team. I would really like to

thank every member of my team. Everyone makes it their first priority to take care of the patients. The nurses, the anesthesiologists, the surgical techs, the radiology techs, the scrubs and my colleagues have dedicated themselves to provide the kind of care that I would want for my family. Thanks everyone for your hard work and dedication!"
